

EJEMPLO DE FOR

ISAAC ACOSTA RODRÍGUEZ

```
for1.c
#include <stdio.h>
#include <conio.h>

main()
{
    int i;
    system("color 9a");
    for(i=0; i<12; i++)
        printf("\t%d", i);
    printf("\nadios...");

    getch();
}
```

The screenshot shows a Windows command prompt window titled "E:\UNAM F.I\Computacion\PROGRAMAS\for1.exe". The window has a blue background and displays the output of the C program. The output consists of three lines: the first line contains the numbers 0 through 8, each followed by a tab character; the second line contains the numbers 9, 10, and 11, each followed by a tab character; and the third line contains the text "adios...". The window also shows standard Windows window controls (minimize, maximize, close) in the top right corner.
